

# MusicRoom program overview

## Information for parents and teachers

### More than just a music lesson

Our programs are based on four key learning principles

- Prepare and commit
- Problem solve and progress
- Patience and respect play a part
- Play and have fun.

All our lessons include music theory appropriate to the age and ability of the students.

Lessons are structured to give students the best possible learning environment. Some work well in groups, others need individual lessons.

We perform at our schools and in our community.

### Come and try – any age

If you are not sure music is for your child, we offer group lessons for on

- recorder
- voice

These lessons are for students of any age and offer a start without making a major commitment.

### Fifteen at 5: new starters

For new entrants aged 5/6. A small group lesson in which we explore different instrument groups, work on basic theory and rhythm, sing and learn what sound is, and always have lots of fun!

### My first instrument: 5 – 7 years

If you have a keen, eager musician we will assess them for lessons from age 5. Some youngsters are ready to have their own lesson. We offer:

- piano/keyboard
- drums/percussion
- ukulele

### Making music: 8 years plus

We offer the same instruments as for the younger students, but also now offer

- brass
- woodwind
- guitar

### MusicRoom and beyond

We combine students from all schools in our regional hubs in performance opportunities so that students can develop their ensemble skills in a supportive environment.

Our programs prepare students for working with specialist instrumental teachers and musical ensembles so they can continue their playing after they graduate from primary school.

### Workshop programs

We work with some amazing musicians to bring specialist workshops to your school. MusicRoom students are given special rates for these events, and are always offered a place before going to the wider school community.

### Our prices
